Thanks Robyn, these look great. My nit picky suggestion is rename mine features as follows:

Change "Gold Dust Mine" to "Gold Dust Shaft"

Change "Willard Mine Tunnel" to "Willard Tunnel"

Change "Puzzle Mine Extension Shaft" to "Puzzle Extension Shaft"

Change "Cally Mine Adit" to "Cally Adit"

Change "Puzzle Mine No. 2" to "Willard Adit No. 2"

The reason being that there is no "Willard Mine," there is no "Cally Mine." There is the Willard Tunnel access way to the Puzzle Mine, and the Cally adit access way to the Ouray Mine. Anyway, it's all historic mining semantics.

Flume locations: one is at or just west of IG-13. The other is midway between IG-7 and IG-6. I haven't installed the dataloggers yet because I had to buy a cable to hook up to the logger docking station. I plan to put them in next Monday and to be at the event on Tuesday, but am getting pulled in a lot of different directions because of the Gold King. - Allen

So we are going to extend the map extant for the figure titled SiteFeatures to be able to see the property ownership for those other features east and west of Willard.

Let me know if you have any thoughts or if you see any problems.

Thanks Allen, great to talk to you, hope you get to go home soon...
